Hypocrisy, lies and deception must be stopped

Even since the Ukraine/Russia conflict, Russia hit back at US and EU sanctions by cutting gas supply to the EU. Russia supplied the EU with 45% of its fuel requirements.

Desperate for fuel to combat the heat of summer, Germany, France, Holland and Italy have all decided to reopen their coal powered stations and imported millions of tons of coal from Bolivia and South Africa, throwing out their carbon emission controls through the window.

These very same countries, for the last decade or two, have been lecturing Africa and Asia to reduce their reliance on fossil fuels, accusing them of destroying the earth's atmosphere with their carbon emissions.

"Europe desperate for fuel "
Suddenly, Europe is desperate for fuel for its citizens, so the rules change.
It's okay for the EU to pollute the atmosphere but not the rest of the world.

Where's the WEF now and their lofty goals at thier lavish summit in May in Sweden bragging about how they will monitor our carbon footprints through digital identities.

They were so hellbent on reducing carbon emissions, cattle in several farms in the US were suddenly destroyed mysteriously.

```
"Bill Gates has all the answers "
```

The all-knowing Bill Gates has the answer to all our problems. He has decided, singlehandedly, that thee world's 7 billion people must stop eating meat.

They must eat manufactured in his lab to make him more money to control the world through his corrupt band of academics, media and politicians supporting him all the way.

This should shut down cattle farming Ramaphosas of the world, abattoirs, butchers, cattle of the world, steak , grill and burger outlets. Millions can go unemployed, starve and die. The globalists, who glibly tell you, "you will own nothing and be happy" would not give a damn about you.

I wonder how cow-worshipping India or Muslims, who slaughter cows to serve the poor are going to respond to this globalist maniacs plan.

```
"Bill Gates and the vaccine"
```

We all know about his role in the Covid plandemic. He became the self-appointed expert on epidemics and Vaccine technology.
He had his teams of journalists, who did his dirty work, to discredit highly accredited scientists like Gert Vanden Bosche and Robert Malone as fakes.

He even went so far as to predict future plandemics by writing a book on it. The idiot Tedros, from the WHO, was Gate's marketing man for a book that should find its way to the dustbin.

```
"Man with a warped brain "
```

He is head of GAVI and GERMS not because he is a medical expert on vaccinology and virology, he has just too much money and a warped brain.

He is the man, who wants to save the world from pandemics but in the same breath, says that the world should get rid of 3 billion people. This evil man is revered by thousands of scientists, reliant on his funding but loathed by millions of ordinary citizens and moral and ethical doctors and lawyers through out the world, who want to see him punished for the harm he has caused to humanity.

"Electric Vehicles - safety "

The mantra to reduce carbon emissions spawned the huge electric vehicle industry. No one has uttered a word about the safety of this technology.

There is one vehicle in 100000 vehicles going up in flames due to battery explosions in India.
We can predict the response of the manufacturers. They will dismiss it as an isolated incident, as they did with the vaccines.
It's still fresh in our minds, how top academics went on an all-out drive, like car salesmen, telling the world how safe and effective this gene therapy was against a very safe virus that needed minimal intervention.

WHO finally admits to 337% hospital admissions due to vaccine injuries

It took the WHO two years to admit that vaccine injuries can cause an increase of 337% in hospital admissions compared to hospitalisation from the infection.
These poster boys of big pharma in our medical institutions have suddenly gone quiet.
None of them will admit that vaccine efficacy against Omicron is a useless 23% after 90 days.

"No reliable data for safety of vaccines on children"

In spite of there being no adequate research for the safety and efficacy of the Vaccines for children, the FDA and CDC have approved vaccines for five to twelve year olds. This in spite of the Vaccine being totally ineffective against Omicron 5. The EU has completely refused to approve vaccines for children. Yet, our education department, like the NHS are encouraging children to take the vaccine.

"Two million people must be vaccinated to save one hospital admissions"

A recent study has shown that 2 million people must be vaccinated with this gene therapy, with numerous serious adverse events to prevent one person landing in hospital. What a waste of precious and scarce resources for other serious but treatable conditions like diabetes, hypertension, asthma, cardiac and other debilitating medical and surgical conditions.

"NHS guilty of perverse incentives "

The NHS is portraying children who take the vaccine as heroes. This is incentivising innocent children to agree to take a drug that very few GPs understand. This is a crime.

Norway's DOH has finally admitted that they made a mistake in the way they handled the pandemic.
This was not a mistake. They were warned against lockdowns and the dangers of gene therapy by top scientists but they listened to the corrupt WHO very influential rich globalists from the WEF.
These people in government should be forced to step down and prosecuted.

"The hypocrisy, lies and deception of the US, Europe and WEF must be exposed".

The EU is a mere 7% of the world's population but it consumes 26% of the world's resources.

"Africa must break free from the shackles of the West"

It's time Africa and Asia broke away from the west and the US.
We can survive on our own, we do not need to be told by the west how to run our lives.
Africa has the largest agricultural land to feed the world with half of the world's food.

We need to get our politics right. We need accountability in government. If ordinary people do not show an interest in government and the way it is taking care of the country, government will abuse us with the help of big businesses as they have done with Covid.

"Lied by governments and public health authorities "

We were lied to by government, the media and low-life Gates funded academics this entire plandemic.

3 million people lost their jobs, the food and beverage industry, hospitality and tourism industry suffered because of unscientifically based Covid policies, contrived by dishonest politicians.

```
"The guilty must be punished"
```

These people must be held accountable by a judiciary that is not captured.
If the legal fraternity does not step up to the plate now, they will be punished, severely for defeating the ends of justice.

The DOH's (South Africa) attorneys admitted that allowing employers to decide their own policy to deal with their staff's Safety was illegal and will be withdrawn.

"They must be prosecuted for not doing their research and causing so much harm to so many people."

Thousands of helpless innocent employees were threatened by employers to take the jab, thousands were dismissed, hundreds suffered serious adverse events and were dumped under the bus by government, doctors and their employers.

All the CCMA cases that were ruled in favour of employers must be retested because the judgements and decisions, made by the commissioners, grossly disobeyed the science.

```
"The WHO is a let down "
```

The WHO has finally agreed with a finding that the Vaccinated have a 337% increased risk of being hospitalised than someone infected with Covid.
The list and evidence against this gene therapy is constantly emerging and growing as the data is revealed.

```
"We don't need the IMF's crippling
loan"
```

We just took a R7.4 billion IMF loan for jabs that are indisputably ineffective against Omicron 5. This is a major crime.
It must be immediately returned.

This is reckless waste that is going to keep us in the spiral of debt and make the IMF and big pharma super rich.

Media like times media, iol, 702 and Cape talk won't mention this. They are all captured by the Gates foundation, George Soros and bezos.
As for Attorney Sujee, a staunch advocate for children's Vaccines, the big question is: what knowledge does she have about this complex gene therapy.
Few doctors understand it, yet she had the gall to state that if children don't take the vaccine in the rural areas, they won't be able to attend school. They will miss out on free school meals. This is coercion of the worst order.
What will she do if one of these children ends up with a severe myocarditis?

Yes she can blast her mouth on MSM but she would not debate with me on alternative channels.
This is an open invitation to all of them.

It's time to fight back, fight corruption, fight our Evil academics, our captured CCMA , judiciary and government for violating our constitutional rights.
We must not allow the NWO to succeed.
All these globalists must be tried for treason, Nuremberg style.

Dr E V Rapiti
26/06/22

Dr Rapiti is a family physician working in a sprawling densely populated sub-economic suburb of Mitchell's Plain, Cape Town for about forty years.

He has been successfully treating Covid patients for the past two years using his unique inexpensive but effective clinical tools along with his own special low cost protocols.
He has been an activist for social justice and equity. He is an author, poet and motivational speaker.
