PLEASE TAKE NOTE

- OUR PRODUCTS ARE 100% NATURALLY DRIED IN THE KALAHARI SUN.
- *Example* After the processing of **1 kg** of apples there remains about **700g** of product when the skin and core of the apples have been removed. This means about **14kg** of fresh produce is used to produce **1kg** of **dried product**. Thus prices of dried fruits and vegetables are often higher than fresh produce per kg.
- Our products are of high quality and standards, which is why we use a **vacuum sealer** to ensure food can be stored away for **10 years** and **longer**.
- We have a 12 month packaging that is a single plastic and not vacuum sealed for those who prefer cost saving and/or short term storage.
- Our products are packaged in high quality bags which are **durable** and **BPA** free.
- **BPA** free is important to ensure food can be stored for a long time **without being contaminated** by the wrapping/container.
- **14 Work days** are required to **prepare orders** as soon as **payments are received**.
- **Orders from R20 000 and up** requires **30 working days**.

VEGETABLES CONVERSION AND RATIOS

Product	Fresh Produce=	Dried Produce
Butternut	14 kg	1 kg
Carrots	17 kg	1 kg
Sweet Potato	8 kg	1 kg
